Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's arguments filed August 26, 2005 are persuasive therefore the USC 102 and 103 rejections in the instant application are hereby withdrawn. Specifically the examiner agrees with Applicant's argument that "the oil escape holes of Townsend are formed by cutting a circumferential groove transverse to the longitudinal splines (see column 2, lines 47-50), not a spiral groove as required in the claims 1, 9, and 17. Townsend restricts the placement of oil escape apertures to within the circumferential groove only, which restricts distribution of the oil escape apertures (see paragraph (00071 of Applicants' application). The spiral grooves of the present application, on the other hand, allow for placement of the oil escape apertures longitudinally along the outer wall. This, therefore, results in the formation of oil escape apertures distributed longitudinally along the outer wall. This improves the oil escape to lubricate the elements contained within the housing (see paragraph (00101 of Applicants' application)".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings filed March 25, 2004 are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
